Dear Health Care Provider,

Consider for a moment that diseases listed in Harrison's Principles of Internal Medicine as symptoms, due to imbalances in the body.

Here are the 5 areas of imbalance in the body which actually need to be treated / corrected: (Our Questionnaire focuses on finding these out: http://www.space-age.com/Questionnaire.doc).

1. Toxins (including metal and hormone toxins)
2. pH Imbalance
3. Intracellular Nutritional Deficiencies
4. Hormonal Imbalances
   (I have added Hormones, but actually the foundation for naturally producing hormones is nutrition)
5. Energy Field Imbalance

If diseases listed in Harrison are symptoms, then the areas of imbalance in the body which need to be corrected can be the real diseases in the body which need to be treated / corrected.

In Preventive Medicine you investigate the root cause of a disease and treat / correct the cause, but do not treat the symptom or shall I say disease as defined in allopathy.

The symptoms go away on their own when the root cause is treated.

In Preventive Medicine, drug induced symptoms are not to be treated but need to be isolated. They disappear when the prescription drugs that caused them are titrated downwards, which happens when the imbalances are gradually corrected.

The three areas of imbalance - Toxins, pH and Energy Field are mentioned in Ayurveda. To this, I have added Nutrition as this is a man made problem of recent times. Hormone Imbalance (besides having its roots in nutritional imbalance) is also an environmental problem due to presence of petrochemical products in our environment. These synthetic hormones (xenoestrogens) are also toxins that need to be neutralized or eliminated from the body. Unfortunately, many of these are not biodegradable and many synthetic hormone prescription drugs have numerous side effects as well.

The scope of Toxins has been expanded to also include heavy metal toxins such as aluminum, arsenic, cadmium, lead, mercury, nickel, etc. which have entered the environment and have created serious imbalances / chronic diseases in the body, at well below their lethal dose levels. There is an urgent need to return the body back to the same levels of these metals as found in unexposed population.

Trust an explanation of this concept will be helpful in your study of evolving standards of preventive and anti-aging medicine.

Blessings,
Pramod Vora
