## Justus von Liebig (1803-1873)

**Justus von Liebig** (May 12, 1803 in Darmstadt, Germany - April 18, 1873 in Munich, Germany) was a German chemist. The chemist who promoted the Liebig Condenser to make distilled water.

### *Organic Chemistry in its Application to Agriculture and Physiology.*

by Justus Von Liebig - 1840

It is probably one of the biggest mistakes in the history of mankind convincing farmers that NPK type fertilizers is the way to go. Justus Von Liebig in 1840 wrote *Organic Chemistry in its Application to Agriculture and Physiology*. Later he repents on his big mistake causing chemical companies to take over and push NPK fertilizers that wind up killing the soil, growing poor quality food and causing a degeneration of health in mass humanity.

### **Von Liebig even said later:**

*"I had sinned against the wisdom of the Creator, and received my righteous punishment. I wished to improve his work, and in my blindness believed that, in the marvelous chain of laws binding life on earth's surface and keeping it always new, a link had been forgotten which I, weak and powerless worm, must supply."*

—Justus von Liebig, late in life  
Quoted from Encyclopedia Britannica, 1899.  
(removed from subsequent editions).

# Mineral Depletion in Soil

The demineralizing effect on the fertility of the soil beginning 60 years after the introduction of the concept of NPK fertilizer by Justus Von Leibig in 1840

## Words of Encouragement & Appreciation

Dr. Gerry Bodekar

Dear Pramod,

Keep up the good work for Nutritional Agriculture - an easy concept to get when one hears it, but easy to miss if one doesn't.

Best regards to you and your wife,  
Dr. Gerry Bodeker  
Editor-in-Chief  
WHO

Dr. E Vadivel

I thank whole heartedly for the vibrant and expressive presentation delivered by you.

Dr. E. Vadivel,  
Director  
TNAU

## **Reader's responses:**

Bravo...Your philosophy reminds me of Charles Walters' work about using the minerals from the sea to restore our soils. "Fertility From The Ocean Deep" was one of his works, which I have not read, but is referred to in the one I did pour over, Minerals for the Genetic Code.

Thanks for your thinking outside of the chemical box.

Hello Pramod,

I am indeed humbled by your kind, generous and persuasive way to enlighten me about your innovation in Soil Enrichment technology.

Yes, I finally read through your whole attachment and must say it is indeed profound and of immense value to me and the whole farming/Nutritional world in general. Your work on this vast and immense subject is indeed Great and Priceless.

I absolutely do agree with all of the write up in the paper, yes we need to put the natural minerals back into our depleted farmland soil and replenish our farm land back to it's full natural nutritional values.

I do want to pursue on this.

I am indeed humbled and feel proud at same time to know you, your immense knowledge and your desire to help others like me and to promote this idea and concept to the whole world, so the whole populous of the world can be more aware and start thinking about Healthy living and Natural living.

God Bless, It is indeed a pleasure and a privilege to know you.

Sincerely,

Rustom
