

Misuse of

ANTIBIOTICS

Pramod Vora

Low Immunity is the prime reason why some people constantly catch colds/Sore Throat and other infections.

Rather than use drug antibiotics in such situations, it is always better to first explore the possibility to improve the body's own immunity.

One of the factors, governing low immunity, is pH (potential Hydrogen or number of Hydrogen Ions or Acidity) of the body. The Natural pH of a healthy body, free of any disease, is always slightly Alkaline at a pH of 7.4.

When the body becomes acidic at the cellular level, it creates a breeding ground for germs, bacteria, and other micro-organisms. These can only flourish and multiply in an acidic environment. If the fluids of the body (blood, saliva, etc), are maintained alkaline, it will be well nigh impossible for these organisms to multiply or even survive.

Standard **pH Test Kits** are available to determine the pH of the fluids in the body by simply testing the pH of the saliva. There exists a very good co-relation between the pH of the saliva and other body fluids, like the blood for instance. There are **Dietary Supplements** available which helps to rapidly adjust the pH of the body and maintain it at an alkaline level.

There is a growing concern about the rampant and unnecessary use of Drug Antibiotics for treatment of some non-life threatening ailments such as common colds and sore throat.

Antibiotics are also now in the environment, as farmers and livestock breeders have indiscriminately begun using these for commercial gains. Antibiotic shots are routinely given to animals kept in unhygienic conditions as a preventive measure.

Antibiotic now, have therefore entered the Food Chain and are gradually damaging everybody's health.

It is noteworthy, to remember that, cancer cells do not easily multiply in an alkaline environment. Controlling and regulating body pH is one of the safest non-invasive techniques of reducing the risk of cancer or controlling or curbing or slowing down cancer cell proliferation in the Body.

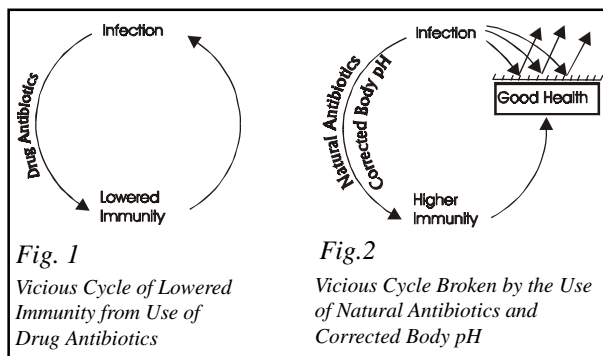

Another technique to improve the immunity of the Body, is to use a **Natural Antibiotic** like **Mono Atomic Silver**. When administered orally, it can boost the Immunity of the Body. **Mono Atomic Silver has been tested in UCLA School of Medicine, California against 650 known pathogens, microorganisms, bacteria, fungi (including Candida Albicans and Candida Globata), protozoa and viruses.** In comparison, Drug Antibiotics are perhaps effective only against half a dozen organisms. Mono Atomic Silver has also been used to improve immunity of AIDs patients. It has no side effects as it is Biocompatible with the hu-

man body. It also has strong **Antiviral** properties. A portable pocket sized instrument for domestic use can, within seconds, produce a glass of Mono Atomic Silver. It is a low cost natural Antibiotic that is very ideally suited for treatment of the masses of a low cost economy like India which live below poverty level.

Remember, a healthy body always has higher immunity. **Eating nutritionally and pH balanced meals** can also go a long way to help raise and maintain the Body's immunity.

Use of **Herbal Dietary Supplements** and **Bio-Magnetic Devices** to enhance the functioning of the thymus gland can also increase the production of T-cells and improve the Body's Natural Defense Mechanism. Info at: <http://www.space-age.com/thymus.html>

Improving immunity, to prevent infections, is a safer and naturally a more harmonious way of maintaining the human body in balance. Trying to remove an infection once it has invaded the body, by trying to "kill germs" with Antibiotics can only create an imbalance in the body and weaken it further. Drug Antibiotics being "**Dumb Chemicals**", kill everything in sight - friends and foes. They destroy the infection causing germs as well as the healthy bacteria required for digestion which work as **Probiotics** in the human body. This ends up lowering the immunity, forcing the body into a perpetual and vicious cycle of repetitive infections coupled with still lower immunity at the end of each cycle. (Fig. 1 & Fig. 2)

The body weakens further with each cycle and the germs develop further resistance and immunity with each onslaught of Antibiotics.

Remember, the germs also have intelligence and they will continue to evolve (develop resistance) to fight their destruction due to Bio-Chemical Warfare that you would like to conduct on the human body.

The stage is now set for diseases like Candida, Colon Cancer, etc to invade and permanently reside in the body, speedily taking it to its final destruction and premature death.

The number of Antibiotics capable of controlling infections, are diminishing rapidly, due to the indiscriminate and repetitive use of Antibiotics. The day is not far away, when the Pharmaceutical Industry may be unable to offer newer and more powerful Antibiotics. The strength of the Antibiotics now being used has grown to such an extent that their after effects linger on in the body for days after their use has been stopped. Replacing the friendly bacteria lost from the body is getting more difficult with each passing day. The present typical Therapeutic Dose of Lactobacillus Acidophilus is 1.0 Billion living organism to be taken twice a day for at least 10 to 15 days after completing the Antibiotic course. Such therapeutic doses are presently not available at the chemists; so correction of the damage done by Drug Antibiotics becomes an uphill task. The body then becomes unbalanced and depleted of its internally manufactured B-Complex Vitamins. Therapeutic doses of B-Complex, as per US Standards, not being readily available, sets the ground work for a host of chronic ailments to invade and begin destroying and rapidly aging the body.

- Please stop the unnecessary use of dangerous Antibiotics.
- Please reserve drug Antibiotics only for life threatening situations.
- Please protect the environment and your body by minimizing the use of these Drug Antibiotics
