

Student Enrollment

Practicing Medical Professionals, preferably MDs with minimum 5 years and preferably 10 years experience can be considered for enrollment at the SpaceAge Institute of Antiaging Research (SIAR).

Areas of specialization of the institute in medicine are elaborated at:

<http://www.space-age.com/siar/SIAR-Intro.pdf>

International Faculty details are at:

<http://www.space-age.com/siar/SpaceAgeFaculty2021.pdf>

SIAR specializes in reversal of chronic diseases such as hypertension, type 2 diabetes, hypothyroidism, pcod (pcos), antiaging various organs of the body, including the heart, whole body transformations for celebrities, socialites and VIPs, etc. with a very high success rate achieved at our Institute during the past few decades. The institute also specializes in the art of safely unprescribing prescription drugs. Level of medical expertise is estimated at least 100 years ahead of present medical knowledge.

So the training you will receive will be current and will not get outdated / obsolete for many more decades to come and will assure you a steady source of income, based on your exclusive knowledge.

The fees for one year course are presently covered under a 50% scholarship program and will cover the cost of consultation and one year treatment for two immediate family members including yourself and your spouse. In addition, your fees will cover free consultation for your immediate family members covering a total of 10 hours duration. We feel this is the best method of getting practical hands on training while understanding and grasping the advanced concepts at SIAR. The best way to learn something totally new is to be your own patient or have a very close family member as a patient. The cost of treatment of two persons is covered under your tuition fees, which are payable in installments.

One year treatment of each patient is covered under a Package treatment plan as per terms of Concierge Medicine which is practiced at SpaceAge.

The benefit of enrollment in this program for a potential Medical Practitioner will be that he/she will be in command of a very exclusive medical knowledge which is not available with other MDs and his/her ability to deliver bottom line results (far and beyond the capability of present day allopathy) in the treatment of patient who wish to and understand the importance of investing in perfect health, free from the use of prescription drugs and their side effects. This will allow MDs to have the ability to create a much better income stream due to the exclusive/quality services they can provide their patients.

FAQs

1. Q. How does this Student Enrollment Program help increase revenue?

Answer: Revenues increase when you offer exceptional services and bottom line results to patients who want to invest in health and desire results well above today's standards of healthcare.

2. Q. Doctors are under the impression that we understand labs and don't need further training.

Answer: This sense of false confidence, in reading labs, comes from the 5 minute superficial reading that MDs do.

Reading and analyzing labs, in the highly complex manner in which we do, is only the beginning.

Based on this complex and elaborate analysis of the blood report, which can take up to one or more hours, will help to identify and diagnose the root cause of the symptoms presently being faced by the patient. Thereafter, you still need to develop a strategy to unravel the symptoms. Most importantly, having access to a highly specialized, supporting Compounding Pharmacy capable of changing blood bio-chemistry, at intracellular levels; and have flexibility to quickly custom formulate, each month, therapeutic doses to suit the anticipated improvements in blood work. This is the foundation of our high success rate at SpaceAge Antiaging Center, in *safely reducing dependance on (un-prescribing) prescription drugs*, in an orderly manner, based on the improvement in the patient's blood / body parameters.

3. Q. Will we get a certificate on the successful completion of the prescribed course work.

Answer: Yes, **SpaceAge Institute of Anti-aging Research, USA** will issue a certificate for each student who successfully completes the prescribed course work.

4. Q. Can we get educational credits

Answer: We are presently not set up for educational credits, but we can enroll and complete the formalities for the same.

Concierge Medicine / Packages

Our health center has completed 10,000+ cases during the past few decades and presently restricts to about 200 active cases under our **Concierge Program**. We try not to take too many cases in order to maintain the quality of our work and ability to pay individual attention to each person. A large number of our cases are located worldwide and we do offer online consultations through e-mails, sms, WhatsApp, Skype, Zoom Video Conferencing, etc.

We have very different standards and methods of reading, interpreting and projecting blood reports into the future; and investigating the root cause, isolating drug induced symptoms and treating the root cause rather than the symptoms. We therefore encourage all potential patients to submit all their older blood reports / medical investigation done for our scrutiny, for a re-read and re-analysis as per **International Standards of Preventive and Anti-Aging / Regenerative Medicine**.

Time and again we have been able to demonstrate extraordinary results (normally considered impossible to achieve in medicine) due to our deep knowledge of Intracellular / Orthomolecular Medicine, Regenerative Medicine (for repairing and improving the efficiency of various organs / functions of the body) and our access to special prescription strength / therapeutic doses of intracellular supplements, which we are able to individually custom formulate at our highly specialized in-house Compounding Pharmacy, to match the exact needs of your blood reports / health goals.

Unlike the "10 minute consultations, here take this prescription and go to the pharmacy" model of most MDs worldwide, we have adapted the Concierge Medicine model of working at our health center.

Concierge Medicine requires our investment of a few hours of consultation time each month for each new case we take up and the subsequent time involved thereafter to monitor and implement the custom protocols drafted to suit each person, in order to ensure these extraordinary results.

Since we continue to work on each case we take up for an extended period of approximately 6 to 12 months, the model of Concierge Medicine suits our health center best. Under the framework of Concierge Medicine we charge a monthly retainer which covers time spent on consultation and the cost of formulations necessary to support the treatment. The retainer does not cover the cost of blood work, other medical investigation or any health devices required under the program. For more information on Concierge Medicine please visit:
https://en.wikipedia.org/wiki/Concierge_medicine

Payments are normally done through purchase of an annual package, with an installment plan (3 equal payments) as an option. Depending on the complications of the case, the cost roughly averages out to \$3000.00 per month for the first 3 to 6 months and thereafter reduces to roughly \$1,500.00 per month as various parameter of the body, at an intracellular level, are brought to their Optimum Values. The costs may be higher for highly complicated cases and chaotic health conditions not responding to allopathy and certain anti-aging and longevity enhancing treatments.

Your Quest For Perfect Health Ends Here !

Our package includes the cost of any specialized formulations provided but excludes the cost of blood work / other medical investigation and any medical devices that may be required to support the treatment.

Trust this will give you a better idea of our commitment of time, sustained effort and an ability to pay undivided attention to each case we take up, to ensure extraordinary results with a higher degree of success.

The above information should help you to adequately prepare yourself to know what to expect, compare it to what is available out there, set your health goals higher and efficiently / economically go about to achieve extraordinary results at our health center.
